QUANTUM
ACCESS
HATCHES

Technical description

Quantum access hatches have been designed for fast trouble free installation on aluminium standing seam roofs. The **Quantum access hatch** is manufactured from aluminium to provide a high structural integrity and an aesthetically attractive product.

A continuous lid seal prevents water ingress and with highly insulated lid and sides the hatch can be fitted in any commercial or industrial unit. Fixed directly to an MR Site Services internal soaker weathering can be achieved without additional flashings, thereby reducing labour and time on site.

The access hatch is supported on the inner soaker transferring the load onto the structure of the building. The unique design feature means the access hatch does not interfere with thermal movement of the roof.

QUANTUM

Access Hatches

QUANTUM
Access Hatches

Quantum is a low profile access hatch designed for mounting onto all types of flat roof, especially secret fix aluminium and steel standing seam roofs. **Quantum access hatches** are supplied with weather-proof insulated lids.

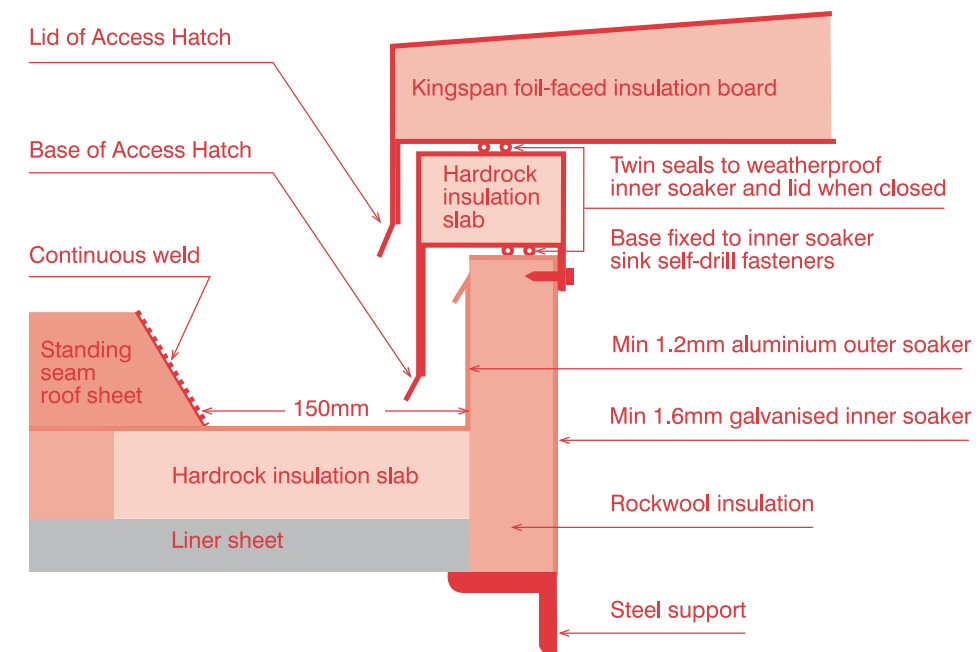

The innovative design provides a product range which meets the demands of specifiers and installers.

Quantum access hatches can be designed in a range of finishes and materials.

Benefits and features

- Non penetrative fixing system
 - eliminates roof leaks, transferring load to structure.
- Gas assisted struts
 - easier opening and closing.
- Fully insulated lid and sides
 - reduces heat loss, minimises condensation.
- Colour coating available
 - allows freedom to match roof or make a feature.
- Modular designs available on short lead times.
- Welded aluminium design
 - low weight and corrosion free.
 - environmentally friendly aluminium is 100% recyclable.
- Locking option available
 - for added building security.
- Control options available
 - can be operated remotely or linked to BMS.

- **Standard or bespoke hatches.**
- **Fabricated to BS EN ISO 9001:2000.**
- **Proven design - used on roofs across the UK.**
- **Suitable for all roofing systems.**
- **Compatible with any material.**
- **Budget single skin options available.**
- **Installation service on-site.**
